SELECTED-CONTENT PREVIEW

New Hire Onboarding KPI Dashboard

A selected KPI definition from the full guide and companion package.

Preview only. The full purchased package contains the complete working materials.
Adapt and approve materials within the purchaser's own quality system before use.

SELECTED-CONTENT PREVIEW

New Hire Onboarding KPI Dashboard

A sample definition from the KPI guide and its companion package.

The source package

KPI Definition Guide; Excel Implementation Tracker; Role-Specific Onboarding Timelines; Leadership Communication Deck; Training Maturity Assessment Scorecard.

How metrics are specified

The guide gives each KPI a definition, calculation approach, data sources, measurement cadence, and common measurement errors. This preview shows one example.

This preview excludes the full KPI catalog, workbook calculations, role timelines, presentation, maturity scoring, and benchmark tables.

SELECTED-CONTENT PREVIEW

Sample KPI: time to independent work

Selected guide content, condensed for public viewing.

Definition and calculation

Calendar days from hire or role-transfer date to documented authorization for independent performance of core job functions. Calculate as authorization date minus hire or transfer date.

Record sources

Hire or transfer date and role assignment come from personnel records. Authorization requires the applicable qualification or supervisor sign-off record; training completion alone may be insufficient.

Interpretation check

Track role transfers separately. Exclude people who leave before completing onboarding, and decide whether contractors follow the same pathway before combining their data.

A site should approve its own definitions, exclusions, data sources, and reporting cadence before using this metric for decisions.
